

# SolCoins

## The Whitepaper

---

[solcoins.io](https://solcoins.io) | [r/SolCoins](https://r/SolCoins) | [@CoinsSol](https://@CoinsSol)

## I. Introduction

### About SolCoins

Our goal is simple: to become a leading community and forum for the discussion and growth of Solana blockchain-based “memecoins” and related projects, partnerships and technology.

## II. Development

In December 2023 we launched our Reddit page [r/SolCoins](#), and even in our most optimistic expectations we didn't envision the rapid growth that it would have and the awesome community that would spring up around it.

Our subreddit membership is now over 12,000 members in just 6 months, and after seeing how active and passionate the community is, and also how many scam projects are out there.. we felt everyone deserved better.

So here at SolCoins, we will be launching our own NFT series and cryptocurrency token!

This will be a community-driven project that will encompass the parts of crypto that we love – a degenerate token, dank memes, creative NFTs and some good 'ol fashioned shilling – and will provide great opportunities for the SolCoins community as well as the new people we hope to bring in along the way.

We are serious about building a quality project, helping people make money, and having a bunch of fun along the way.

## III. NFT Coin Series

### Overview

Instead of having a presale for the launch of our token, we will be minting an NFT (non-fungible token) series that will be tied to multiple airdrops for holders.

There will be 4 different versions of the NFT coins.. Platinum, Gold and Silver, as well as “golden ticket” NFTs called Fire Coins.. only 7 Fire Coins will be available!

Each variety of coin comes with their own corresponding percent amount of each airdrop (see **Airdrop** section below).

## Launch Details

A limited number of 777 NFTs will be minted, and will be available for purchase for 0.1 SOL (around \$15.00 USD) each.

Type	Count
Silver Coin	388
Gold Coin	284
Platinum Coin	98
Fire Coin	7
<b>Total</b>	<b>777</b>

If you're unfamiliar with minting in an NFT collection, each purchase generates a random NFT out of the collection and deposits it in your wallet.

We expect sales and resales of our NFTs to be robust, however if they do not sell out, we will burn all of the remaining unpurchased NFTs.

50% of the profit from the NFT sales will be used for liquidity for the token, and the remaining 50% will be used for development and marketing.

## Airdrops

By being a holder of one of the SolCoins NFTs, you will be eligible for an initial launch airdrop and also subsequent frequent airdrops over the course of the rest of 2024, totaling 20% of the supply of our token (see **Tokenomics** below).

The preliminary airdrop schedule is:

#1 – ~5% of supply – Launch

#2 – ~2% of supply – 3-4 weeks after launch

And thereafter ~1% of supply every 10-14 days until 20% of supply is reached.

We will not be disclosing the exact day or time of the airdrops to prevent any malicious buying/selling activity.

Also, depending on how well the token performs, we may use a portion of the reserve (see **Tokenomics** below) for additional future airdrops.

## NFT Varieties – Airdrop amounts

Per the initial ~5% airdrop, NFT holders will receive:

Type	Tokens per NFT	% of Supply	Count	Total Tokens
Silver Coins	32,500	0.00325%	388	12,610,000
Gold Coins	65,000	0.0065%	284	18,460,000
Platinum Coins	150,000	0.015%	98	14,700,000
Fire Coins	600,000	0.06%	7	4,200,000
<b>Total</b>	-	-	<b>777</b>	<b>49,970,000</b>

And the subsequent airdrops will be based on these amounts and percentages. (i.e. the 1% drops will be 1/5th of the above amounts)

## Partnerships

Some developers in our community have expressed interest in airdropping tokens to our NFT holders to promote their projects. There will never be a cost to holders for these future airdrops.

## IV. Cryptocurrency Token

### Launch Details

About 3 weeks after our NFT series sale ends, we will launch our cryptocurrency token on Solana. The name & ticker symbol will not be disclosed beforehand.

Immediately after launch we will airdrop the first tokens to all NFT holders and announce the name & contract address on all of our socials.

### Expectations

Our community is strong, and we think they will be excited to support our launch initiative. We've had SolCoins members ask us repeatedly if we are planning on launching a token.. so we feel the enthusiasm for the project will be there.

Our token will be a slow, gradual upward trend, not the usual pump, dump, stabilize and then slowly die kind of coin. We anticipate a continued rise of our market cap and are planning for the long-term success of our token!

## V. Tokenomics

1 billion total supply

20% NFT airdrops

50% liquidity

10% marketing/PR/Dex listings

10% reserve

10% team

## VI. Marketing

### Reddit

The main driver of our community (and therefore our NFTs & token) is our Reddit page r/SolCoins. The membership is growing by about 100 people per day, and we plan on tapping into the community to help grow the project.

We also plan on posting extensively on Reddit in other memecoin-related subreddits to gain traction and new holders. We are already the recommended memecoin subreddit for r/Solana.

### Twitter/X

Our Twitter/X page @CoinsSol has also had robust growth, with around 2,500 followers. We plan on increasing our activity on Twitter/X prior to and after launch.

### Telegram

We have started a Telegram channel now that our NFT project is underway, and it is growing nicely. Several moderators will eventually be utilized to provide community management and Twitter/social raids to maximize our Telegram presence.

### Influencers/KOLs

We've already reached out to multiple influencers and KOLs who will be calling our token once we reach certain benchmarks. We plan on increasing these relationships moving forward.

### Organic

Other organic growth will come through partnerships, PR announcements, sponsorships, and charities, as well as listings on DEXs, coin sites and through the existing SolCoins community's network.

## VII. Our Team

### Neofrog

Neo is a full-stack programmer with over 10 years of development experience and a passion for crypto. Neo is in charge of web development, art direction, Reddit/Discord management, and financial oversight.

### Breakfast

Breakfast is an insurance executive who is a degenerate at heart. Breakfast's 15 years of marketing experience lends itself well to this endeavor, and is in charge of development, outreach, social media marketing, corporate management, legal, and financial oversight.

## VIII. Roadmap

*\*\* All dates listed are "completed by" dates*

### June 2024

- Launch/mint of our NFT series
- Marketing for our NFT series begins
- Release of SolCoins whitepaper
- www.solcoins.io website launched
- Launch of our Telegram channel

### July 15th-17th, 2024

- Launch of token
- 1st NFT Airdrop completed
- Mint disable and LP burnt
- Telegram Buy.bot updated with custom gif
- Telegram stickers & memes updated
- Dexscreener & Dextools updated
- Marketing for our token begins

### August 1st, 2024

- Marketing increases for our token - Reddit, Twitter/X, r/SolCoins
- Marketing increases for our NFT series - socials, prizes, promoters
- Callers, influencers & KOLs contacted
- List on coin sites (Solhunters, Moontok, Coinscope, NTM, Gemfinder)
- Telegram Twitter/X raids consistently

- Token listed on CoinGecko & GeckoTerminal
- Token listed on Birdeye
- Token confirmed on strict list

### **August 15th, 2024**

- 2nd NFT Airdrop completed
- 3rd & subsequent 1% of supply NFT Airdrops every 10-14 days

### **September 1st, 2024**

- Marketing continues for our token - Reddit, Twitter/X, r/SolCoins
- Marketing continues for our NFT series - socials, prizes, promoters
- Telegram Twitter/X raids consistently for both
- Continued contact of callers, influencers & KOLs
- DEX listings researched & possibly budgeted

### **January 1st, 2025**

- All NFT Airdrops completed
- Future Airdrops considered from reserve

## **IX. Summary**

We are happy that our community has responded well to our NFT release, is enjoying the art and is excited about the upcoming coin launch!

Our community is growing, word is spreading, and we feel that we'll have the momentum to achieve great things.

Together we will make this project a great success, and it will definitely be a fun ride!

LFG!!
